SUMMARY

Innovation AI developer at Denali Advanced Integration with software engineering and entrepreneurial experience. Founder and developer of ScribbleScan.app, an LLM-based handwriting digitization service with industry leading accuracy. Technical expertise in Python, computer vision and agentic AI development, with business acumen and a track record of measurable impact.

PROFESSIONAL EXPERIENCE

Innovation AI Developer

Denali Advanced Integration, Aug 2025 – Present

- **Build edge vision AI solutions** for large logistics and retail customers, from idea to proof of concept to pilot
- **Main developer of Packbench of the Future,** which won 2 categories at the 2026 global Cisco Partner Innovation Challenge
- **Develop internal AI tooling** for our own teams: dev workflows, plugins and MCP architectures
- **Lead internal AI adoption:** champion-led workshops that map where AI helps each team's daily work, then team sessions where those champions present the use cases in their own language

Founder and Developer

ScribbleScan.app, Feb 2025 – Present

- **Independently developed** and launched an innovative handwriting digitization company leveraging AI APIs
  - **Engineered** unheard of solutions for image/non-textual content preservation to ensure no page data is lost.
  - **Built custom preprocessing** pipelines to ensure efficient and expected results.
  - **LLM API integration** workflows in Python. Mitigating issues with non-determinism in production
  - **Founded** ScribbleScan LLC in Washington State

Software Engineering Intern

2nd Chair AI, Summer 2024

- **Quickly mastered** a new full-stack technology suite –including a Python framework (Fast-API), JavaScript, and other tools such as electron– to effectively develop and deploy production-level code.
- **Helped lead** the implementation of unique features for identifying section headers and visualizing complex document structures, significantly improving AI content retrieval and increasing F1 score by 74% (.42 to .73).

PROJECTS

- **Do-It:** agent orchestration tool for Claude Code sessions on a remote server, soon open source
- **David's Skills:** Claude Code plugin for my dev workflow, from guided planning to autonomous builds
- NBA Match Prediction achieving 80% accuracy on 2024 playoffs including 3 upsets - See demo on my portfolio
  - Convolutional neural network trained on NBA team statistics using PyTorch

TECHNICAL SKILLS (and more)

- **Programming Languages:** Python, Java, JavaScript, HTML, CSS
- **AI/ML & CV Frameworks:** PyTorch, TensorFlow, OpenCV, Keras, Scikit-learn, Pandas, PyMuPDF, NumPy
- **Other Frameworks/APIs:** FastAPI, Gemini, Anthropic and OpenAI
- **Tools:** Git, Docker, Linux, Jupyter Notebooks, VS code, IntelliJ
- **AI-Assisted and Agentic Development:** Claude Code, Codex, Cursor, MCP servers and multi-agent workflows
- DIII **college varsity tennis** player and teammate, 4 years

EDUCATION/COURSES TAKEN

University of Puget Sound Class of 2025

Bachelor of Science in Computer Science, Minor in Mathematics (3.5 GPA)

- Coursework: AI | DSA| Software Engineering | Databases | Graphics | Stats | Discrete Math | Linear Algebra
- Other Studies: Management | Business Law and Ethics | Ancient Greek Philosophy | Climate Modeling | Spanish
